Gallatin Steel, a flat-rolled steel minimill in Ghent, Kentucky, is accepting applications for industrial electrical and mechanical maintenance technicians.

Electrical maintenance positions will be responsible for maintaining the facility’s electrical and control systems. Duties include but are not limited to inspection, calibration, preventative maintenance, troubleshooting and repair of electrical instrumentation controls, pneumatic and hydraulic actuators as well as switchgear, motors and other electrical equipment. Knowledge in motors, digital and analog electronics, schematics, print reading and control circuits, AC/DC theory and electrical maintenance, computers/PLC and test instruments, power supplies, power distribution and construction/installation, and mechanical and hand/power tools as it relates to manufacturing equipment is preferred. Familiarity with Allen Bradley PLCs, Siemens Simadyn D and S7 PLCs, Pomini grinders, Siemens drives and motors is a plus.

Mechanical maintenance positions will be responsible for assuring that all production equipment is maintained. Duties include but are not limited to welding (6G a plus); troubleshooting, repairing and replacing gear boxes; alignments; hydraulic and pneumatic logic; pump repair; and practicing safe mechanical and rigging processes. Knowledge in reading and working with mechanical blue prints, and pump and air compressor repair as it relates to manufacturing equipment is preferred.

In addition to maintenance tasks, maintenance positions may also be required to assist in and perform operating, administrative and housekeeping assignments.

Successful candidates must have a high school diploma or equivalent, have working knowledge in the areas of electrical and/or mechanical maintenance, be comfortable working in heat and at elevated heights, be highly motivated and organized, show initiative, be willing to work 12-hour rotating shifts, have excellent communication and interpersonal skills and have an interest in learning new skills. Also preferred is a proficiency in CMMS systems and a minimum of six months experience in a manufacturing environment. Crane maintenance experience a plus.

The successful candidate must also be environmentally conscious and promote environmental awareness.

We offer a competitive salary with bonus potential and a comprehensive benefits package including medical, dental, life, disability, 401k retirement plan with company match and educational assistance.

Drug screening and background checks are part of our hiring process.
